მოგესაღმებით ქაღბატონებო და ბაქონებო,

სიამაყის გეძნობით მინდა წამოგიღინოთ ბანკი ქახოუს 2007 წლის ფინანსური შეღებები, კაპიტალისა და აქცივების ჩენჭაბელობის კოეფიციენტები, რომელმაც შესაბამისად 15,3% და 4,4% შეაღინებს. ბანკის მთელი კოლექტივის ღაუზოგავმა და მიზანსწავებულმა მუშაობამ, სწორებ განსაზღვეულმა და მკაფიოდ ჩამოყალიბებულმა მიზნებმა, საშეაცება მოგვცა სასუჟველი შეღების მიღწევის, რომითაც ჩვენ მყარი პოზიცია ღავიყავეთ საბანკო სექტორის პირველ სამეცნიერო.

ჩვენ ღიღ რომ ვანიჭიბთ ბანკის ინსტიტუციონალურ განვითარებას. შესაბამისად გაღიანვეცილებების მიღების პროცესი მეტად გამჭვიჩვალე გახდა, ხორც თანამშრომების ჩახორციელების ხასისხი გაუმჯობესდა.

ბანკი ქახოუს ძირითადი პრიორიტეტი 2007 წელს კონკრეტული კოინცენტრისათვის ესკადრიული საფინანსო მომსახურების შეთავაზება იყო. ასევე მნიშვნელოვნად გაფართოვდა ფიზიკური პირებისათვის შეთავაზებული საბანკო პროექტების სპეციული. მომავალში, ჩვენ კვლავ გავაგედებთ ინტენსიურ მუშაობას ჩვენი კოინცენტრისათვის მაქსიმალურ კომფორტული პროცესების შესაქმნელად.

მნიშვნელოვანი გაღიანვეცილება, რომელიც მიღებული იქნა 2007 წელს, ასეს საექთაშორისო საფინანსო ინსტიტუციებთან მოღაპახავების ღანუება აქციების ღამაცებითი ემისიის მიყიდვაზე. ახალი აქციონერის შემოსვის კიდევ უფრო მიმზიდვებს გახდის ბანკ ქახოუს, რომელს სხვა საფინანსო ინსტიტუციებისათვის, ასევე მომხმარებლისათვის.

მინდა, მაღლობა გაღიანვეხადო ჩვენი ბანკის კოინცენტებს და აქციონერებს, რომელთა მხარეაჭერა და სცადების მიზნები გვაძლევს საშეაცებას მნიშვნელოვანი წვლილი შევისანიოთ ჩვენი ქვეყნის ეკონომიკის განვითარებაში.

## STATEMENT OF THE CHAIRMAN OF THE SUPERVISORY BOARD

Dear Ladies and Gentlemen,

I'm pleased to present you the Cartu Bank 2007 financial results, the capital and asset profitability coefficients of 15.3% and 4.4% respectively. The relentless efforts and dedication of the Bank's staff, as well as the clear-cut objectives have made it possible to achieve the result, setting us among the top three banks in the banking sector.

We pay plenty of attention to the institutional development of the Bank. Consequently, the decision-making became transparent and the staff involvement degree heightened.

Offering the exclusive financial service to the corporate clients was the chief priority of "Cartu Bank" in 2007. The range of the banking products offered to the physical persons also broadened significantly. We are still creating the most flexible banking products for our clients.

A significant decision regarding the launch of the negotiations with the international financial institutions on the sale of the extra emission shares was made in 2007. The attraction of a new shareholder shall make "Cartu Bank" even more attractive to other financial institutions and the consumers.

I would like to express gratitude to our clients and shareholders, whose support and strategic goals allow us to make a significant contribution to the economic development of our country.

## STATEMENT OF THE DIRECTOR GENERAL

Dear Ladies and Gentlemen,

2007 marked a success in the development of "Cartu Bank". Owing to a large-scale cooperation with the international financial institutions, the Bank provided a long-term financing to small and medium-sized businesses, the import replacement production, the processing of the agricultural production and other related fields.

The Bank Management focused on the creation and strengthening of the development structures; the Department of Business Development groups were formed. They share three main business lines: marketing, service quality and the market development.

Certain steps were taken towards branch network expansion. Two new branches opened in Tbilisi with two others planned to open in 2008-2009. Three new branches are going to operate in Telavi, Gori and Bakuriani, the areas where the Bank has no branches at the moment. Consequently, "Cartu Bank" will be represented in all the areas of high business activity.

A broader service to our corporate clients, offering the new products and meeting customers' demands for the banking, namely, retail products are the 2008 priorities.

**CORPORATE BANKING**

The support and long-term relationships with the corporate clients is a part of the "Cartu Bank" strategy.

The corporate banking department, key for meeting the challenge was formed in 2007. The highly qualified and experienced staff was selected as corporate bankers.

Their scope is:

- ⌚ the development of the long-term collaboration between the Bank and its clients;
- ⌚ to offer the service to the client that meets their expectations;
- ⌚ preparation of offers targeted at the development of a client;
- ⌚ overcoming any difficulties in the Bank-Client relationships;
- ⌚ elaboration and offer of the client-oriented services;
- ⌚ a prompt reaction to the client initiatives.

The aforementioned conception has made the Bank-Client relationships more close-knit, comfortable and straightforward.

ANNUAL REPORT

## LOAN PORTFOLIO

In 2007, "Cartu Bank" made significant steps towards the enlargement of its corporate client base and the provision of a higher quality service. The volume of its credit portfolio exceeded 349 mln GEL – 48.6% more than in the year before. The net loan formed 98% of the total loans and 87% of the Bank's net assets.

At the end of the reporting period, the average weighted per cent of the Bank's credit portfolio reached 14%.

In 2007, the Bank stepped up its long-term crediting and the over a year term loans amounted to 85% of the total loans.

A number of significant projects were implemented in Tbilisi and the provinces as a result of the flexible credit policy of "Cartu Bank". The trend of an increased number of the borrowers became clear-cut.

Given the high priority of an increased industrial potential and its support, the financing of the import replacement and export-oriented production is gaining ground. Therefore, "Cartu Bank" remains one of the major creditors of the Georgian industry. Over the last three years "Cartu Bank" focused its crediting on three priority sectors: industry, commerce and service. By the end of 2007, the financing of the industry formed 39% of the credit investments.

## PLASTIC CARDS ISSUING AND ACQUIRING

2007 marked another success in the development of the plastic card business in Georgia; "Cartu Bank" was licensed to distribute "American Express" cards. Consequently, it is now the only bank in the Georgian banking sector licensed for both the issuance and service of the Visa and MasterCard, it also concluded the contract on the distribution and service of "American Express" cards in Georgia and the one on the service "Diners Club" cards. In 2007, the number of the Bank's plastic card-holders and their turnover in the outlets increased by 80% and 86% respectively.

ANNUAL REPORT

allows Cartu Bank to serve another rapidly increasing field. In 2007, the turnover in the area stepped up significantly, while the Bank gained plenty of experience rendering high quality service to the clients.

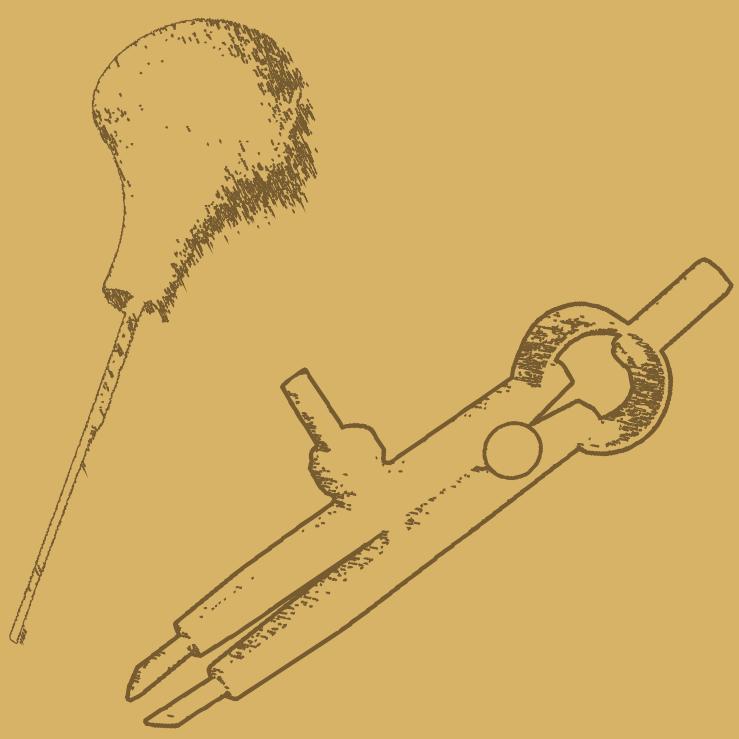

Cartu Bank's in-house processing allows us to serve other banks, and this is what we did in 2007, with the number of the Banks served by our processing center to hopefully increase in 2008-2009.

### PHYSICAL PERSONS

One of the "Cartu Bank's" priorities in 2007 was an enlargement of the banking product service and offering the full banking services to physical persons. The Bank stands out for the variety of transfer systems, deposits and high quality service. Both the physical persons and legal entities are offered distance banking service.

This year, the network of the Bank branches and ATM's broadened and the service became more convenient. By means of the unified bases, the clients can be rendered the service at any "Cartu Bank" branch and service center without opening an extra account.

## THE MODERN AND INNOVATIVE FINANCIAL SOLUTIONS FOR THE CLIENTS

2007 marked a big success to "Cartu Bank". The investments were made in IT, the enlargement of its network of branches and the development of its staff.

The investment was made in the development of the IT systems since the hi-technology and leadership is crucial to the Bank's viability and a streamlined operation. In 2007, several significant projects were implemented, the centralization of the branch data-base was completed and the changes were made in nearly all the IT components, of which the following were the most important:

### THE HARDWARE SUPPORT

From the decentralized model of the hardware support operation the bank got over to the centralized one. The investment was made in the top quality and reliability servers and the information preservation systems.

The high productivity and continuity guidelines formed the basis of the system construction, which ultimately means the safety, integrity, availability and a timely processing of the Bank's most important asset – the information. The aforementioned makes an impact on the quality and promptness of the service rendered to our clients, both the Bank's biggest challenges.

Thin client, widely employed in the world's financial and service sectors, was put into operation. Owing to a number of the computing operations, the employment of the terminal implies cost-cuts in the creation of extra customers and the simplification of the technical administration.

## THE SOFTWARE SUPPORT

The Bank resumed its Core banking System, thus unifying the databases of the branches. Most of the programs elaborated before were renewed in order to achieve the compatibility with the architecturally re-designed Core banking System module. The aforesaid allows the Bank clients to get the necessary service at any branch of the Bank, wherever they may have their accounts, thus a branch is no obstacle to the service.

## THE DATA- BASES

Instead of the centralized management model, Cartu Bank introduced the centralized model of management, which facilitated the generation of the data copies, made the data speedily accessible and controllable.

## THE TELECOMMUNICATIONS

The cutting-edge hi-tech solutions were introduced in the telecommunication, that is the warranty of the best safety.

The network communications with the branches were resumed. The Reserve Lines for the branches, allowing an unhampered banking service to the clients are being processed. A project involving the communication with the branches via the local telephone network was implemented. It is going to speed up the information exchange and will consequently secure a better quality communication among the employees.

A new model of deposits was created. The main reason behind the purchase of the product was larger potential software. The module integrated in the core banking System of the Bank allows a speedy servicing of the deposits to the satisfaction of the clients.

The Wi-Fi Internet, offering the Bank's prospected and existing clients a free access to the Internet at the Bank's service centers via the personal computers and mobile phones, was installed at the Bank's head office and its Saburtalo district service center.

## საპროცესინგო სისტემი

პრასტიკული ბაზარების კუთხით განახლდა საპროცესინგო სენტრი (პროგრამული, ინფორმაციული და აპარატული კუთხით). განახლებული საპროცესინგო სენტრი საშუალებას აძლევს ბანქს თავის ყორენტებს და ასოცირებულ წევების შესთავაზოს ახალი, ხარისხიანი მომსახურება. ამ სისტემის უზრუნველსაყოფად შეძლილი იქნა მათ პროცესი:

მოციანად საინფორმაციო აუქტომობილი განხორციელებულმა ინვესტიციამ 1,6 მლნ ლარი შეაღინა.

## წარმატები

2007 წელს ბანკის მიერ კატეგორიული განვითარებისათვის განვითარებულმა ინვესტიციამ 140 ათასი ლარი შეაღინა.

ეს თანხა ძირითადად კატეგორიული განათლებას, საექითაშორისო კონფერენციებზე მონაწილეობას, მოცივაციის ამაღლებასა და სხვადასხვა წამახალისებების აქცივობას მოხმახდა.

## ფინანსურის კავშირობა

2007 წლის განმავლობაში გაფართოვდა ბანკი ქართული ფინანსურის ქადაგი. ამ მიმართულებით განხორციელებულმა ინვესტიციამ 690,000 ლარი შეაღინა.

## THE RELATIONSHIPS WITH THE INTERNATIONAL FINANCIAL INSTITUTIONS

In 2007, relationships were established with the Black Sea Trade and Development Bank (BSTDB), resulting in a framework collaboration agreement. On 19 September 2007, a treaty was signed over a 1.5 mln USD short-term renewable credit line. From 2008, the credit line is going to be increased up to 5 mln USD. The aforesaid financial resources will be employed into the crediting of the trade among the Black Sea basin countries, envisaging the import-export funding of the Georgian enterprises. Along with the BSTDB, the negotiations are underway over the credit line to fund the small and medium-size business and the co-funding of the major projects.

On 20 March 2007, an agreement was signed with the Ministry of Finance within the frameworks of the World Bank (WB) supported project to be implemented here by the International Development Association (IDA) and the International Foundation for Agricultural Development (IFAD). On the grounds of the aforesaid contract, "Cartu Bank" was allocated a 2.5 mln USD credit line for funding the agricultural projects.

In 2007, an agreement was reached with the American Express Bank over the allocation of 1 mln USD trade support credit line.

ANNUAL REPORT

### THE BANKS PRIORITIES IN TERMS OF THE HUMAN RESOURCE POLICY ARE AS FOLLOWS:

- ➊ the creation of a single strategic, functional, operational and financial system and a joint setting of the objectives;
- ➋ the development of the staff, since the highly qualified employees are one of the competitive advantages of the Bank;
- ➌ The enlargement of the network of branches plays a significant part in the human resource policy. As a result of the branch network expansion, there has been increased the total number of the employees and it also allowed the promotion of the existing staff.

Our employees form the society. We are fully aware of the fact that the success of the on plans is largely determined by the attraction, retention and a further development of the potential of the highly professional personnel. Our employees form a significant asset and, therefore, the relevant investments are deemed the most promising.

CARTU BANK GROUP

**STATEMENT OF MANAGEMENT'S RESPONSIBILITIES FOR THE PREPARATION AND APPROVAL  
OF THE CONSOLIDATED FINANCIAL STATEMENTS  
FOR THE YEAR ENDED 31 DECEMBER 2007**

The following statement, which should be read in conjunction with the independent auditors' responsibilities stated in the independent auditors' report set out on pages 2-3, is made with a view to distinguishing the respective responsibilities of management and those of the independent auditors in relation to the consolidated financial statements of Joint Stock Company Cartu Bank (the "Bank") and its subsidiary (the "Group").

Management is responsible for the preparation of the consolidated financial statements that present fairly the financial position of the Group at 31 December 2007, the results of its operations, cash flows and changes in equity for the year then ended, in accordance with International Financial Reporting Standards ("IFRS").

In preparing the consolidated financial statements, management is responsible for:

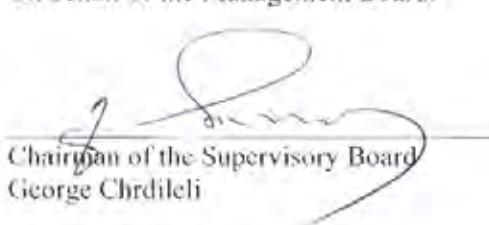

- Selecting suitable accounting principles and applying them consistently;
- Making judgments and estimates that are reasonable and prudent;
- Stating whether IFRS have been followed, subject to any material departures disclosed and explained in the consolidated financial statements; and
- Preparing the consolidated financial statements on a going concern basis, unless it is inappropriate to presume that the Group will continue in business for the foreseeable future.

Management is also responsible for:

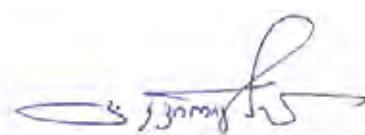

- Designing, implementing and maintaining an effective and sound system of internal controls, throughout the Group;
- Maintaining proper accounting records that disclose, with reasonable accuracy at any time, the financial position of the Group, and which enable them to ensure that the consolidated financial statements of the Group comply with IFRS;
- Taking such steps as are reasonably available to them to safeguard the assets of the Group; and
- Detecting and preventing fraud, errors and other irregularities.

The consolidated financial statements for the year ended 31 December 2007 were authorized for issue on 14 May 2008 by the Management Board.

On behalf of the Management Board:

  
Chairman of the Supervisory Board  
George Chrdileli

## INDEPENDENT AUDITORS' REPORT

To the Shareholders and the Board of Directors of Cartu Bank Group:

We have audited the accompanying consolidated financial statements of Joint Stock Company Cartu Bank (the "Bank") and its subsidiary (the "Group"), which comprise the consolidated balance sheet as at 31 December 2007, and the consolidated income statement, consolidated statements of changes in equity and cash flows for the year then ended, and a summary of significant accounting policies and other explanatory notes.

### Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with International Financial Reporting Standards. This responsibility includes: designing, implementing and maintaining internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error; selecting and applying appropriate accounting policies; and making accounting estimates that are reasonable in the circumstances.

### Auditor's Responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audit. We conducted our audit in accordance with International Standards on Auditing. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

**Opinion**

In our opinion, the consolidated financial statements present fairly, in all material respects the financial position of the Group as at 31 December 2007, and its financial performance and cash flows for the year then ended in accordance with International Financial Reporting Standards.

As discussed in Note 4, the financial statements for the year ended 31 December 2006 have been restated.

**I. ORGANISATION**

ISC Cartu Bank (the "Bank") is a joint-stock bank, which was incorporated in Georgia in the year 1996. The Bank is regulated by the National Bank of Georgia (the "NBG") and conducts its business under general license number 229. The Bank's primary business consists of commercial activities, originating loans and guarantees, operations with securities, foreign currencies, and taking deposits.

The registered address of the Bank is 39a Chavchavadze Avenue, Tbilisi, Georgia.

The Bank has one branch and two service centers in Tbilisi and branches in Kutaisi and Batumi.

The Bank is a parent company of the Cartu Bank Group (the "Group"). The following subsidiary is consolidated in the financial statements:

Name	Country of operation	The Bank's ownership interest		Type of operation
		2007	2006	
Insurance Company Cartu LLC	Georgia	60%	60%	Insurance

Insurance Company Cartu LLC was formed as a limited liability partnership under the laws of Georgia on 13 September 2001. The company's principal activity is insurance.

The Bank also has investments in other subsidiaries and associates, Cartu Broker LLC (100%) and Reestri 2001 LLC (60%), that have not been consolidated as such consolidation would not have had a significant effect on the consolidated financial statements taken as a whole.

As at 31 December 2007 and 2006, the following shareholders owned shares of the Bank:

Shareholder	31 December 2007		31 December 2006	
	%	%	%	%
ISC Cartu Group	25%	25%	25%	25%
Interservice LLC	25%	25%	25%	25%
ISC Transinvest	25%	25%	25%	25%
ISC Lagundi	25%	25%	25%	25%
<b>Total</b>	<b>100%</b>		<b>100%</b>	

Ultimate shareholder having control over the Group's operations is Bidzina Ivanishvili.

These consolidated financial statements were authorized for issue by the Management Board of the Group on 14 May 2008.

## 2. BASIS OF PRESENTATION

### **Accounting basis**

These financial statements of the Group have been prepared in accordance with International Financial Reporting Standards ("IFRS") issued by the International Accounting Standards Board ("IASB") and Interpretations issued by the International Financial Reporting Interpretations Committee ("IFRIC").

These financial statements are presented in thousands of Georgian Lari ("GEL"), unless otherwise indicated. These financial statements have been prepared under the historical cost convention, except for the measurement at fair value of certain financial instruments.

The Bank and its subsidiary maintain their accounting records in accordance with IFRS. These consolidated financial statements have been prepared based on accounting records of the Bank and its subsidiary.

### **Key assumptions**

The preparation of consolidated financial statements in accordance with IFRS requires management to make estimates and assumptions that affect the reported amounts. Such estimates and assumptions are based on the information available to the Group's management as of the date of the consolidated financial statements. Therefore, actual results could differ from those estimates and assumptions. Estimates that are particularly susceptible to change relate to the provisions for impairment losses and the fair value of financial instruments.

Key assumptions concerning the future and other key sources of estimation uncertainty at the balance sheet date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial period include:

	31 December 2007	31 December 2006
Allowance for impairment losses for loans to customers	342,317	227,539

Loans to customers are measured at amortized cost less allowance for impairment losses. The estimation of allowances for impairments involves the exercise of significant judgment.

The Group estimates allowances for impairment with the objective of maintaining balance sheet provisions at a level believed by management to be sufficient to absorb probable losses incurred in the Group's loan portfolio. The calculation of provisions on impaired loans is based on the likelihood of the asset being written off and the estimated loss on such a write-off. These assessments are made using statistical techniques based on historic experience. These determinations are supplemented by various formular calculations and the application of management judgment.

The Group considers accounting estimates related to provisions for loans key sources of estimation uncertainty because: (i) they are highly susceptible to change from period to period as the assumptions about future default rates and valuation of losses relating to impaired loans and advances are based on recent performance experience, and (ii) any significant difference between the Group's estimated losses (as reflected in the provisions) and actual losses will require the Group to take provisions which, if significantly different, could have a material impact on its future income statement and its balance sheet. The Group's assumptions about estimated losses are based on past performance, past customer behavior, the credit quality of recent underwritten business and general economic conditions, which are not necessarily an indication of future losses.

Determining whether goodwill is impaired requires an estimation of the value in use of the cash-generating units to which goodwill has been allocated. The value in use calculation requires the management to estimate the future cash flows expected to arise from the cash-generating unit and a suitable discount rate in order to calculate present value.

Details on the goodwill impairment loss for the years ended 31 December 2007 and 2006 are provided in Note 18.

The accounting policy for the impairment of financial instruments is discussed in Note 3 below. Taxation is discussed in Notes 11 and 25.

#### **Functional currency**

The functional currency of the consolidated financial statements is the Georgian Lari.

### **3. SIGNIFICANT ACCOUNTING POLICIES**

#### **Basis of consolidation**

The consolidated financial statements incorporate the financial statements of the Bank and entity controlled by the Bank (its subsidiary) made up to 31 December each year. Control is achieved where the Bank has the power to govern the financial and operating policies of an investee entity so as to obtain benefits from its activities.

On acquisition, the assets and liabilities and contingent liabilities of a subsidiary are measured at their fair values at the date of acquisition. Any excess of the cost of acquisition over the fair values of the identifiable net assets acquired is recognized as goodwill. The minority interest is stated at the minority's proportion of the fair values of the assets and liabilities recognized. Subsequently, any losses applicable to the minority interest in excess of the minority interest are allocated against the interests of the parent. The equity attributable to equity holders of the parent and net income attributable to minority shareholders' interests are shown separately in the consolidated balance sheet and income statement, respectively.

Where necessary, adjustments are made to the financial statements of subsidiaries to bring the accounting policies used into line with those used by the Group.

All significant intra-group transactions, balances, income and expenses are eliminated on consolidation.

The difference, if any, between the carrying amount of minority interest and the amount received on its purchase is recognized in equity attributable to the equity holders of the parent.

#### **Goodwill**

Goodwill arising on consolidation represents the excess of the cost of acquisition over the Group's interest in the fair value of the identifiable assets, liabilities and contingent liabilities of a subsidiary at the date of acquisition.

The Group tests goodwill for impairment at least annually.

If the Group's interest in the net fair value of the identifiable assets, liabilities and contingent liabilities exceeds the cost of the business combination, the Group:

- (a) Reassesses the identification and measurement of the Group's identifiable assets, liabilities and contingent liabilities, and the measurement of the cost of the combination; and
- (b) Recognizes immediately in profit or loss any excess remaining after that reassessment.

On disposal of an investment, the attributable amount of goodwill is included in the determination of the profit or loss on disposal.

**Recognition and measurement of financial instruments**

The Group recognizes financial assets and liabilities on its consolidated balance sheet when it becomes a party to the contractual obligation of the instrument. Regular way purchase and sale of the financial assets and liabilities are recognized using settlement date accounting. Regular way purchases of financial instruments that will be subsequently measured at fair value between trade date and settlement date are accounted for in the same way as for acquired instruments.

Financial assets and liabilities are initially recognized at fair value plus, in the case of a financial asset or financial liability not at fair value through profit or loss transaction costs that are directly attributable to acquisition or issue of the financial asset or financial liability. The accounting policies for subsequent re-measurement of these items are disclosed in the respective accounting policies set out below.

**Cash and cash equivalents**

Cash and cash equivalents include cash on hand, unrestricted balances on correspondent and time deposit accounts with the National Bank of Georgia with original maturity within 90 days, advances to banks in countries included in the Organization for Economic Co-operation and Development ("OECD"). For purposes of determining cash flows, the minimum reserve deposit required by the National Bank of Georgia is not included as a cash equivalent due to restrictions on its availability.

**Due from banks**

In the normal course of business, the Group maintains advances and deposits for various periods of time with other banks. Due from banks with a fixed maturity term are subsequently measured at amortized cost using the effective interest method. Those that do not have fixed maturities are carried at amortized cost based on expected maturities. Amounts due from credit institutions are carried net of any allowance for impairment losses.

**Loans to customers**

Loans to customers are non-derivative assets with fixed or determinable payments that are not quoted in an active market other than those classified in other categories of financial assets.

Loans granted by the Group are initially recognized at fair value plus related transaction costs. Subsequently, the loan carrying value is measured using the effective interest method. Loans to customers are carried net of any allowance for impairment losses.

**Write off of loans and advances**

Loans and advances are written off against allowance for impairment losses in case of uncollectibility of loans and advances, including through repossessions of collateral. Loans and advances are written off after being in arrears for more than one year.

### **Impairment losses**

The Group accounts for impairment losses of financial assets when there is objective evidence that a financial asset or group of financial assets is impaired. Impairment losses are measured as the difference between carrying amounts and the present value of expected future cash flows, including amounts recoverable from guarantees and collateral, discounted at the financial asset's original effective interest rate, for financial assets which are carried at amortized cost. If in a subsequent period the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognized, the previously recognized impairment loss is reversed by adjusting an allowance account. For financial assets carried at cost the impairment losses are measured as the difference between the carrying amount of the financial asset and the present value of estimated future cash flows, discounted at the current market rate of return for a similar financial asset. Such impairment losses are not reversed.

The determination of impairment losses is based on an analysis of the risk assets and reflects the amount which, in the judgment of management, is adequate to provide for losses incurred. Provisions are made as a result of an individual appraisal of risk assets for financial assets that are individually significant, and an individual or collective assessment for financial assets that are not individually significant.

The change in impairment losses is charged to profit either through allowance account financial assets that are carried at amortized cost) or direct write-off (financial assets carried at cost). The total of impairment losses is deducted in arriving at assets as shown in the consolidated balance sheet. Factors that the Group considers in determining whether it has objective evidence that an impairment loss has been incurred include information about the debtors' or issuers' liquidity, solvency and business and financial risk exposures, levels of and trends in delinquencies for similar financial assets, national and local economic trends and conditions, and the fair value of collateral and guarantees. These and other factors may, either individually or taken together, provide sufficient objective evidence that an impairment loss has been incurred in a financial asset or group of financial assets.

It should be understood that estimates of losses involve an exercise of judgment. While it is possible that in particular periods the Group may sustain losses that are substantial relative to the allowance for impairment losses, it is the judgment of management that the allowance for impairment losses is adequate to absorb losses incurred on the risk assets, at the balance sheet date.

### **Investments held to maturity**

Investments held to maturity are debt securities with determinable or fixed payments. The Group has the positive intent and ability to hold them to maturity. Such securities are carried at amortized cost, less any allowance for impairment. Amortized discounts are recognized in interest income over the period to maturity using the effective interest method.

### **Investments available-for-sale**

Investments available-for-sale represent equity investments that are intended to be held for an indefinite period of time. Such securities are initially recorded at fair value. The market for the Group's investments available-for-sale is not active. Non-marketable equity securities are stated at cost, less impairment losses, if any, unless fair value can be reliably measured.

### **Property, plant and equipment and intangible assets**

Property, plant and equipment and intangible assets are carried at historical cost less accumulated depreciation and any recognized impairment loss. Depreciation on assets under construction and those not placed in service commences from the date the assets are ready for their intended use.

Depreciation is charged on the carrying value of property, plant and equipment and intangible assets and is designed to write off assets over their useful economic lives. It is calculated on a straight line basis at the following annual prescribed rates:

Buildings and other real estate	2%
Furniture and equipment	20%
Data processing equipment	20%
Other	14%-17%
Intangible assets	10%

Leasehold improvements are amortized over the life of the related leased asset. Expenses related to repairs and renewals are charged when incurred and included in operating expenses unless they qualify for capitalization.

The carrying amounts of property, plant and equipment and intangible assets are reviewed at each balance sheet date to assess whether they are recorded in excess of their recoverable amounts, and where carrying values exceed this estimated recoverable amount, assets are written down to their recoverable amount.

An impairment is recognized in the respective period and is included in operating expenses. After the recognition of an impairment loss the depreciation charge for property, plant and equipment and intangible assets is adjusted in future periods to allocate the assets' revised carrying value, less its residual value (if any), on a systematic basis over its remaining useful life.

#### Taxation

Income tax expense represents the sum of the current and deferred tax expense.

The current tax expense is based on taxable profit for the year. Taxable profit differs from net profit as reported in the consolidated income statement because it excludes items of income or expense that are taxable or deductible in other years and it further excludes items that are never taxable or deductible. The Group's current tax expense is calculated using tax rates that have been enacted during the reporting period.

Deferred tax is the tax expected to be payable or recoverable on differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit, and is accounted for using the balance sheet liability method. Deferred tax liabilities are generally recognized for all taxable temporary differences and deferred tax assets are recognized to the extent that it is probable that taxable profits will be available against which deductible temporary differences can be utilized. Such assets and liabilities are not recognized if the temporary difference arises from goodwill or from the initial recognition (other than in a business combination) of other assets and liabilities in a transaction that affects neither the tax profit nor the accounting profit.

Deferred tax liabilities are recognized for taxable temporary differences arising on property, equipment and intangible assets, and interest accrued on loans to customers, except where the Group is able to control the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future.

The carrying amount of deferred tax assets is reviewed at each balance sheet date and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax is calculated at the tax rates that are expected to apply in the period when the liability is settled or the asset is realized. Deferred tax is charged or credited in the consolidated income statement, except when it relates to items charged or credited directly to equity, in which case the deferred tax is also dealt with in equity.

Deferred income tax assets and deferred income tax liabilities are offset and reported net on the balance sheet if:

- The Group has a legally enforceable right to set off current income tax assets against current income tax liabilities; and
- Deferred income tax assets and the deferred income tax liabilities relate to income taxes levied by the same taxation authority on the same taxable entity.

#### **Due to banks, customer accounts and subordinated debt**

Due to banks, customer accounts and subordinated debt are initially recognized at fair value. Subsequently, amounts due are stated at amortized cost and any difference between net proceeds and the redemption value is recognized in the consolidated income statement over the period of the borrowings using the effective interest method.

#### **Compound financial instruments**

The component parts of compound instruments issued by the Group are classified separately as financial liabilities and equity in accordance with the substance of the contractual arrangement. At the date of issue, the fair value of the liability component is estimated using the prevailing market interest rate for a similar non-convertible instrument. This amount is recorded as a liability on an amortized cost basis using the effective interest method until extinguished upon conversion or at the instrument's maturity date. The equity component is determined by deducting the amount of the liability component from the fair value of the compound instrument as a whole. This is recognized and included in equity, net of income tax effects, and is not subsequently remeasured.

#### **Provisions**

Provisions are recognized when the Group has a present legal or constructive obligation as a result of past events, and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate of the obligation can be made.

#### **Financial guarantee contracts issued and letters of credit**

Financial guarantee contracts and letters of credit issued by the Group are credit insurance that provides for specified payments to be made to reimburse the holder for a loss it incurs because a specified debtor fails to make payment when due under the original or modified terms of a debt instrument. Such financial guarantee contracts and letters of credit issued are initially recognized at fair value. Subsequently they are measured at the higher of (a) the amount recognized as a provision and (b) the amount initially recognized less, where appropriate, cumulative amortization of initial premium revenue received over the financial guarantee contracts or letter of credit issued.

#### **Share capital**

Contributions to share capital are recognized at their cost. External costs directly attributable to the issue of new shares, other than on a business combination, are deducted from equity net of any related income taxes.

#### **Additional paid in capital**

Additional paid in capital represents the initial recognition discount of subordinated convertible debt received for the entities under the common control of the ultimate shareholder of the Group. Additional paid in capital is not remeasured subsequently.

#### **Retirement and other benefit obligations**

In accordance with the requirements of the Georgian legislation, the Group withholds amounts of pension contributions from employee salaries and pays them to the state pension fund. In addition such pension system provides for calculation of current payments by the employer as a percentage of current total disbursements to staff. Such expense is charged in the period the related salaries are earned. Upon retirement all retirement benefit payments are made by state pension fund. The Group does not have any pension arrangements separate from the State pension system of Georgia. In addition, the Group has no post-retirement benefits or other significant compensated benefits requiring accrual.

#### **Recognition of income and expense**

Interest income and expense are recognized on an accrual basis using the effective interest method. The effective interest method is a method of calculating the amortized cost of a financial asset or a financial liability or group of financial assets or financial liabilities and of allocating the interest income or interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument or, when appropriate, a shorter period to the net carrying amount of the financial asset or financial liability.

Once a financial asset or a group of similar financial assets has been written down (partly written down) as a result of an impairment loss, interest income is thereafter recognized using the rate of interest used to discount the future cash flows for the purpose of measuring the impairment loss.

Interest earned on assets at fair value are classified within interest income.

Loan origination fees are deferred, together with the related direct costs, and recognized as an adjustment to the effective interest rate of the loan. Where it is probable that a loan commitment will lead to a specific lending arrangement, the loan commitment fees are deferred, together with the related direct costs, and recognized as an adjustment to the effective interest rate of the resulting loan. Where it is unlikely that a loan commitment will lead to a specific lending arrangement, the loan commitment fees are recognized in the consolidated income statement over the remaining period of the loan commitment. Where a loan commitment expires without resulting in a loan, the loan commitment fee is recognized in the consolidated income statement on expiry. Loan servicing fees are recognized as revenue as the services are provided. All other commissions are recognized when services are provided.

#### **Foreign currency translation**

Monetary assets and liabilities denominated in foreign currencies are translated into Georgian Lari at the appropriate spot rates of exchange ruling at the balance sheet date. Foreign currency transactions are accounted for at the exchange rates prevailing at the date of the transaction. Profits and losses arising from these translations are included in net gain on foreign exchange operations.

#### **Rates of exchange**

The exchange rates at the year-end used by the Group in the preparation of the consolidated financial statements are as follows:

	31 December 2007	31 December 2006
Georgian Lari/1 US Dollar	1.5916	1.7135
Georgian Lari/1 Euro	2.3315	2.2562

#### **Offset of financial assets and liabilities**

Financial assets and liabilities are offset and reported net on the consolidated balance sheet when the Group has a legally enforceable right to set off the recognized amounts and the Group intends either to settle on a net basis or to realize the asset and settle the liability simultaneously. In accounting for a transfer of a financial asset that does not qualify for derecognition, the Group does not offset the transferred asset and the associated liability.

#### **Adoption of new standards**

In the current year, the Group has adopted all of the new and revised Standards and Interpretations issued by the International Accounting Standards Board (the IASB) and the International Financial Reporting Interpretations Committee (the IFRIC) of the IASB that are relevant to its operations and effective for reporting periods beginning on 1 January 2007. The adoption of these new and revised Standards and Interpretations has not resulted in significant changes to the Group's accounting policies that have affected the amounts reported for the current or prior years except for the effect of application of IFRS 7 "Financial Instruments: Disclosure" ("IFRS 7").

IFRS 7 is effective for the annual period beginning on or after 1 January 2007. IFRS 7 establishes new requirements and recommendations on financial instrument disclosure. Adoption of IFRS 7 did not affect the classification and measurement of the Group's financial instruments in the consolidated financial statements. Additional information was disclosed in the consolidated financial statements for the current and comparative reporting periods as required by IFRS 7.

According to IAS 1 Presentation of financial statements – Disclosures (IAS 1), the Group shall disclose information that enables users of its consolidated financial statements to evaluate the entities objectives, policies and processes for managing capital.

## **4. PRIOR PERIOD ADJUSTMENTS AND RECLASSIFICATIONS**

#### **Prior period adjustments**

In 2007 the Group's management discovered errors in the consolidated financial statements for the year ended 31 December 2006. Transactions related to the recognition and measurement of the subordinate convertible debt received from the entities under common control of the Group's shareholder were not properly recorded. In accordance with IAS 8 "Accounting Policies, Changes in Accounting Estimates and Errors" the correction of the errors was done retrospectively. Comparative amounts were restated and the corrections were made to the earliest prior period presented.

The effect of the adjustments made to the consolidated financial statements for the year ended 31 December 2006 is as follows:

Type of correction	Amount of correction	Financial statement item	As previously reported 31 December 2006/year ended 31 December 2006	As restated 31 December 2006/year ended 31 December 2006
Equity component of convertible debt	42,458	Subordinated debt	-	42,458
Net foreign exchange loss on accounting of subordinated convertible debt as a compound financial instrument	(1,877)	Net gain/(loss) on foreign exchange operations	458	(1,419)
Initial recognition discount of subordinated debt from the Bank's related party	3,817	Additional paid in capital	-	3,817
Unwinding of discount of subordinated debt	(1,515)	Interest expense	(3,520)	(5,105)
Correction of the earliest prior period presented	(3,688)	Retained earnings	23,112	19,424

#### Reclassifications

Certain reclassifications have been made to the financial statements as at 31 December 2006 to conform to the presentation as at 31 December 2007 as current year presentation provides better view of the financial position of the Group.

Nature of reclassification	Amount	Balance sheet/income statement line as per the previous report	Balance sheet/income statement line as per current report
Intangible assets	1,154	Property, equipment and intangible assets	Other assets

## **11. INCOME TAXES**

The Group provides for taxes based on the tax accounts maintained and prepared in accordance with Georgian tax regulations, which differ from International Financial Reporting Standards.

Starting from 1 January 2008 corporate income tax rate has changed from 20% to 15%.

The Group is subject to certain permanent tax differences due to non-tax deductibility of certain expenses and a tax free regime for certain income.

Deferred taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for tax purposes. Temporary differences as at 31 December 2007 and 2006 relate mostly to different methods of income and expense recognition as well as to recorded values of certain assets.

Temporary differences as at 31 December 2007 and 2006 comprise:

	31 December 2007	31 December 2006
<b>Deductible temporary differences:</b>		
Goodwill	<u>6,365</u>	<u>3,618</u>
<b>Total deductible temporary differences</b>	<u>6,365</u>	<u>3,618</u>

The loan is repayable in fifteen years from the date of disbursement.

At 21 June 2004 the Group entered into a subordinated convertible debt agreement with an entity under the common control of the ultimate shareholder of the Group, Georgian Holding Ltd., which provided the Group with a subordinated convertible loan bearing interest at 2% per annum in the amount of USD 10,000 thousand (GEL 15,916 thousand). The loan is repayable in fifteen years from the date of disbursement.

At 27 February 2002 the Group entered into a subordinated convertible debt agreement with an entity under the common control of the ultimate shareholder of the Group, Christa Enterprises Ltd., which provided the Group with a convertible subordinated loan bearing interest at 6% per annum in the amount of USD 3,500 thousand (GEL 5,571 thousand). The loan is repayable in fifteen years from the date of disbursement.

The subordinated convertible debt is represented by the subordinated convertible debt agreements with the entities under common control of the ultimate shareholder of the Group and provided a put option, according to which the Group had a right to sell ordinary shares of the Group to each of the lenders at a nominal value at maturity. The put option of each of the agreements comprised 25% of the share capital of the Group as of conversion date. As at 31 December 2006, the put option under the agreements included in equity component of convertible debt amounted to GEL 42,458 thousand. The initial recognition adjustment of the loans on bringing interest rates to market in the amount of GEL 3,817 thousand is included in additional paid-in capital.

In the event of bankruptcy or liquidation of the Group, repayment of this debt is subordinate to the repayments of the Group's liabilities to all other creditors.

## **24. SHARE CAPITAL**

As at 31 December 2007 and 2006 authorized, issued and paid-in share capital consisted of ordinary shares with par value of GEL 100 per.

As at 31 December 2007 the Group's share capital comprised of the following number of shares of GEL 100 each:

As at 31 December 2006 the Group's share capital comprised of the following number of shares of GEL 100 each:

	Authorized share capital	Unissued share capital	Paid share capital	Total share capital
Ordinary shares	30,000	25,284	54,716	54,716

As at 31 December 2007 and 2006 the number of shares outstanding was 547,160 thousand.

## **25. COMMITMENTS AND CONTINGENCIES**

In the normal course of business, the Group is a party to financial instruments with off-balance sheet risk in order to meet the needs of its customers. These instruments, involving varying degrees of credit risk, are not reflected in the consolidated balance sheet.

The Group's maximum exposure to credit loss under contingent liabilities and commitments to extend credit, in the event of non-performance by the other party where all counterclaims, collateral or security prove valueless, is represented by the contractual amounts of those instruments.

The Group uses the same credit control and management policies in undertaking off-balance sheet commitments as it does for on-balance operations.

Provision for losses on contingent liabilities amounted to GEL 334 thousand and GEL 163 thousand as at 31 December 2007 and 2006, respectively.

As at 31 December 2007 and 2006 the nominal or contract amounts were:

	31 December 2007 Nominal Amount	31 December 2006 Nominal amount
<b>Contingent liabilities and credit commitments</b>		
Guarantees issued and similar commitments	21,886	8,392
Letters of credit and other transaction related contingent obligations	4,306	9,553
Commitments on loans and unused credit lines	<u>10,874</u>	<u>8,430</u>
<b>Total contingent liabilities and credit commitments</b>	<b>37,066</b>	<b>26,375</b>

Extension of loans to customers within credit line limits is approved by the Group on a case-by-case basis and depends on borrowers' financial performance, debt service and other conditions. As at 31 December 2007 and 2006 such unused credit lines were GEL 10,874 thousand and GEL 8,430 thousand, respectively.

**Capital commitments** – The Group had no material commitments for capital expenditures outstanding as at 31 December 2007 and 2006.

**Operating lease commitments** – No material rental commitments were outstanding as at 31 December 2007 and 2006.

**Legal proceedings** – From time to time and in the normal course of business, claims against the Group are received from customers and counterparties. Management is of the opinion that no material unascertained losses will be incurred and accordingly no provision has been made in these consolidated financial statements.

**Taxation** – Due to the presence in Georgian commercial legislation, and tax legislation in particular, of provisions allowing more than one interpretation, and also due to the practice developed in a generally unstable environment by the tax authorities of making arbitrary judgment of business activities, if a particular treatment based on the management's judgment of the Group's business activities was to be challenged by the tax authorities, the Group may be assessed additional taxes, penalties and interest. Such uncertainty may relate to valuation of financial instruments, loss and impairment provisions and market level for deals' pricing. The Group believes that it has already made all tax payments, and therefore no allowance has been made in the consolidated financial statements.

*Pension and retirement plans* – Employees receive pension benefits from Government of Georgia in accordance with the laws and regulations of the country. As at 31 December 2007 and 2006, the Group was not liable for any supplementary pensions, post-retirement health care, insurance benefits, or retirement indemnities to its current or former employees.

*Operating environment* – The Group's principal business activities are within Georgia. Laws and regulations affecting the business environment in Georgia are subject to rapid changes and the Group's assets and operations could be at risk due to negative changes in the political and business environment.

## **26. SUBSEQUENT EVENTS**

During the year ended 31 December 2007 the Group and the entities under the common control of the ultimate shareholder of the Group providing the subordinated convertible debt to the Group agreed to change the debt interest rates and extinguish convertibility term from the loan agreements. At 13 May 2008 the Group concluded agreements on these amendments and reflected the effect of this adjusting post balance sheet event in its consolidated financial statements for the year ended 31 December 2007. The subordinated convertible loans are disclosed in Note 23.

## **27. TRANSACTIONS WITH RELATED PARTIES**

Related parties or transactions with related parties, as defined by IAS 24 "Related party disclosures", represent:

- (a) Parties that directly, or indirectly through one or more intermediaries, control, or are controlled by, or are under common control with, the Group (this includes parents, subsidiaries and fellow subsidiaries); have an interest in the Group that gives them significant influence over the Group; and that have joint control over the Group;
- (b) Associates – enterprises on which the Group has significant influence and which is neither a subsidiary nor a joint venture of the investor;
- (c) Joint ventures in which the Group is a venturer;
- (d) Members of key management personnel of the Group or its parent;
- (e) Close members of the family of any individuals referred to in (a) or (d);
- (f) Parties that are entities controlled, jointly controlled or significantly influenced by, or for which significant voting power in such entity resides with, directly or indirectly, any individual referred to in (d) or (e).

In considering each possible related party relationship, attention is directed to the substance of the relationship, and not merely the legal form. The Group had the following transactions outstanding as at 31 December 2007 and 2006 with related parties:

## 28. FAIR VALUE OF FINANCIAL INSTRUMENTS

Estimated fair value disclosures of financial instruments are made in accordance with the requirements of IAS 32 "Financial Instruments: Presentation" and IAS 39 "Financial Instruments: Recognition and Measurement". Fair value is defined as the amount at which the instrument could be exchanged in a current transaction between knowledgeable willing parties in an arm's length transaction, other than in forced or liquidation sale. The estimates presented herein are not necessarily indicative of the amounts the Group could realize in a market exchange from the sale of its full holdings of a particular instrument.

The fair value of financial assets and liabilities compared with the corresponding carrying amount in the consolidated balance sheet of the Group is presented below:

	31 December 2007		31 December 2006	
	Carrying amount	Fair value	Carrying amount	Fair value
<b>Cash and balances with the National</b>

## **29. REGULATORY MATTERS**

Quantitative measures established by regulation to ensure capital adequacy require the Group to maintain minimum amounts and ratios (as set forth in the table below) of total (8%) and tier 1 capital (4%) to risk weighted assets.

The ratio was calculated according to the principles employed by the Basle Committee by applying the following risk estimates to the assets and off-balance sheet commitments net of allowances for impairment losses:

<b>Estimate</b>	<b>Description of position</b>
0%	Cash and balances with the National Bank of Georgia
0%	State debt securities
20%	Due from banks for up to 1 year
100%	Loans to customers
100%	Guarantees
50%	Obligations and commitments on unused loans with the initial maturity of over 1 year
100%	Other assets

As at 31 December 2007 the Group's total capital amount for Capital Adequacy purposes was GEL 165,543 thousand and tier 1 capital amount was GEL 103,340 thousand with ratios of 42.65% and 27.60%, respectively.

As at 31 December 2006 the Group's total capital amount for Capital Adequacy purposes was GEL 171,642 thousand and tier 1 capital amount was GEL 83,619 thousand with ratios of 60.27% and 45.62%, respectively.

As at 31 December 2007 and 2006 the Group included in the computation of Total capital for Capital adequacy purposes the subordinated debt received, limited to 50% of Tier 1 capital. In the event of bankruptcy or liquidation of the Group, repayment of this debt is subordinate to the repayments of the Group's liabilities to all other creditors.

## **30. CAPITAL MANAGEMENT**

The Group manages its capital to ensure that entities in the Group will be able to continue as a going concern while maximizing the return to stakeholders through the optimization of the debt and equity balance.

The capital structure of the Group consists of debt, which includes subordinated debt disclosed in Note 21, and equity attributable to equity holders of the parent, comprising issued capital, reserves and retained earnings as disclosed in consolidated statement of changes in equity.

The Management Board reviews the capital structure on a semi-annual basis. As a part of this review, the Board considers the cost of capital and the risks associated with each class of capital. Based on recommendations of the Board, the Group balances its overall capital structure through the payment of dividends, new share issues as well as the issue of new debt or the redemption of existing debt.

The Group's overall capital risk management policy remains unchanged from 2006.

### **31. RISK MANAGEMENT POLICIES**

Management of risk is fundamental to the Group's banking business and is an essential element of the Group's operations. The main risks inherent to the Group's operations are those related to;

- Credit exposures
- Liquidity risk
- Market risk

The Group recognises that it is essential to have efficient and effective risk management processes in place. To enable this, the Group has established a risk management framework, whose main purpose is to protect the Group from risk and allow it to achieve its performance objectives. Through the risk management framework, the Group manages the risks the following risks;

#### **Credit risk:**

The Group is exposed to credit risk which is the risk that one party to a financial instrument will fail to discharge an obligation and cause the other party to incur a financial loss.

Risk management and monitoring is performed within set limits of authority, by the Credit Committees and the Group's Management Board. Before any application is made by the Credit Committee, all recommendations on credit processes (borrower's limits approved, or amendments made to loan agreements, etc.) are reviewed and approved by the branch risk-manager or the Risk Management Department. Daily risk management is performed by the Head of Credit Departments and Branch Credit Divisions.

The Group structures the level of credit risk it undertakes by placing limits on the amount of risk accepted in relation to one borrower, or groups of borrowers, and to industry segments. Limits on the level of credit risk by a borrower, industry sector are approved quarterly by the Management Board. The exposure to any one borrower including banks and brokers is further restricted by sub-limits covering on and off-balance sheet exposures which are set by the Credit Committee. Actual exposures against limits are monitored on a regular basis.

Where appropriate, and in the case of most loans, the Group obtains collateral and corporate and personal guarantees but some portion is personal lending, where no such facilities can be obtained. Such risks are monitored on a continuous basis and subject to annual or more frequent reviews.

Commitments to extend credit represent unused portions of credit in the form of loans, guarantees or letters of credit. The credit risk on off-balance sheet financial instruments is defined as a probability of losses due to the inability of a counterparty to comply with the contractual terms and conditions. With respect to credit risk on commitments to extend credit, the Group is potentially exposed to a loss in an amount equal to the total unused commitments. However, the likely amount of the loss is less than the total unused commitments since most commitments to extend credit are contingent upon customers maintaining specific credit standards. The Group applies the same credit policy to the contingent liabilities as it does to the balance sheet financial instruments, i.e. the one based on the procedures for approving the grant of loans, using limits to mitigate the risk, and current monitoring. The Group monitors the term to maturity of off balance sheet contingencies because longer term commitments generally have a greater degree of credit risk than short-term commitments.

### **Maximum exposure**

The Group's maximum exposure to credit risk varies significantly and is dependent on both individual risks and general market economy risks.

The following table presents the maximum exposure to credit risk of balance sheet and off balance sheet financial assets. For financial assets in the balance sheet, the maximum exposure is equal to the carrying amount of those assets prior to any offset or collateral. For financial guarantees and other off balance sheet assets, the maximum exposure to credit risk is the maximum amount the Group would have to pay if the guarantee was called on or in the case of commitments, if the loan amount was called on.

**As at 31 December 2007:**

	<b>Maximum exposure</b>
Due from banks	11,451
Loans to customers	343,317
Investments available-for-sale	92

**As at 31 December 2006:**

	<b>Maximum exposure</b>
Due from banks	29,207
Loans to customers	227,539
Investments available-for-sale	92
Investments held-to-maturity	5,283

Financial assets are graded according to the current credit rating that has been issued by an internationally regarded agency Fitch. The highest possible rating is AAA. Investment grade financial assets have ratings from AAA to BBB. Financial assets which have ratings lower than BBB are classed as speculative grade.

The following table details the credit ratings of financial assets held by the Group as at 31 December 2007:

	AAA	AA	A	BBB	>BBB	Not rated	Total at 31 December 2007

The banking industry is generally exposed to credit risk through its loans to customers and interbank deposits. With regard to the loans to customers this risk exposure is concentrated within Georgia.

The exposure is monitored on a regular basis to ensure that the credit limits and credit worthiness guidelines established by the Group's risk management policy are not breached.

The following table details the carrying value of assets that are impaired and the ageing of those that are past due but not impaired:

**As at 31 December 2007:**

## **Geographical concentration**

The ALMC exercises control over the risk in the legislation and regulatory arena and assesses its influence on the Group's activity. This approach allows the Group to minimize potential losses from the investment climate fluctuations in Georgia.

The geographical concentration of assets and liabilities is set out below:

## **Liquidity risk**

Liquidity risk refers to the availability of sufficient funds to meet deposit withdrawals and other financial commitments associated with financial instruments as they actually fall due.

The Assets and Liabilities Management Committee ("ALMC") controls these types of risks by means of maturity analysis, determining the Group's strategy for the next financial period. Current liquidity is managed by the Treasury Department, which deals in the money markets for current liquidity support and cash flow optimisation.

In order to manage liquidity risk, the Group performs daily monitoring of future expected cash flows on clients' and banking operations, which is a part of assets/liabilities management process. The Management Board sets limits on the minimum proportion of maturing funds available to meet deposit withdrawals and on the minimum level on interbank and other borrowing facilities that should be in place to cover withdrawals at unexpected levels of demand.

## **Cash flow interest rate risk**

Cash flow interest rate risk is the risk that the future cash flow of a financial instrument will fluctuate because of change in market interest rates.

The ALMC also manages interest rate and market risks by matching the Group's interest rate position, which provides the Group with a positive interest margin. The Risk Management Department conducts monitoring of the Group's current financial performance, estimates the Group's sensitivity to changes in interest rates and its influence on the Group's profitability.

The majority of the Group's contracts on loans received and certain financial assets bear interest that is either fixed or variable. The Group monitors its interest rate margin and consequently does not consider itself exposed to significant interest rate risk or consequential cash flow risk.

The following table presents an analysis of interest rate risk and thus the potential of the Group for gain or loss. Effective interest rates are presented by categories of financial assets and liabilities to determine interest rate exposure and effectiveness of the interest rate policy used by the Group.

## Market risk

Market risk covers interest rate risk, currency risk and other pricing risks to which the Group is exposed. There have been no changes as to the way the Group measures risk or to the risk it is exposed.

The Group is exposed to interest rate risks as entities in the Group borrow funds at both fixed and floating rates. The risk is managed by the Group maintaining an appropriate mix between fixed and floating rate borrowings.

The ALMC also manages interest rate and market risks by matching the Group's interest rate position, which provides the Group with a positive interest margin. The Risk Management Department conducts monitoring of the Group's current financial performance, estimates the Group's sensitivity to changes in interest rates and its influence on the Group's profitability.

#### **Interest rate sensitivity**

The Group manages fair value interest rate risk through periodic estimation of potential losses that could arise from adverse changes in market conditions. The Risk Management Department conducts monitoring of the Group's current financial performance, estimates the Group's sensitivity to changes in fair value interest rates and its influence on the Group's profitability.

The following table presents a sensitivity analysis of interest rate risk, which has been determined based on "reasonably possible changes in the risk variable". The level of these changes is determined by management and is contained within the risk reports provided to key management personnel.

## **Currency risk**

Currency risk is defined as the risk that the value of a financial instrument will fluctuate due to changes in foreign exchange rates. The Group is exposed to the effects of fluctuations in the prevailing foreign currency exchange rates on its financial position and cash flows.

The ALMC controls currency risk by management of the open currency position on the estimated basis of Georgian Lari devaluation and other macroeconomic indicators, which gives the Group an opportunity to minimize losses from significant currency rate fluctuations toward its national currency. The Treasury Department performs daily monitoring of the Group's open currency position with the aim to match the requirements of the National Bank of Georgia.

The Group's exposure to foreign currency exchange rate risk is presented in the table below:

#### Currency risk sensitivity

The following table details the Group's Sensitivity to a 5% increase and decrease in the USD against the GEL. 5% is the sensitivity rate used when reporting foreign currency risk internally to key management personnel and represents management's assessment of the possible change in foreign currency exchange rates. The sensitivity analysis includes only outstanding foreign currency denominated monetary items and adjusts their translation at the end of the period for a 5% change in foreign currency rates. The sensitivity analysis includes external loans as well as loans to foreign operations within the Group where the denomination of the loan is in a currency other than the currency of the lender or the borrower.

	As at 31 December 2007		As at 31 December 2006	
	GEL/USD +5%	GEL/USD -5%	GEL/USD +5%	GEL/USD -5%
Impact on profit or loss	1,060	(1,060)	1,230	(1,230)
Impact on equity	269	(269)	976	(976)

#### **Limitations of sensitivity analysis**

The above tables demonstrate the effect of a change in a key assumption while other assumptions remain unchanged. In reality, there is a correlation between the assumptions and other factors. It should also be noted that these sensitivities are non-linear, and larger or smaller impacts should not be interpolated or extrapolated from these results.

The sensitivity analyses do not take into consideration that the Group's assets and liabilities are actively managed. Additionally, the financial position of the Group may vary at the time that any actual market movement occurs. For example, the Group's financial risk management strategy aims to manage the exposure to market fluctuations. As investment markets move past various trigger levels, management actions could include selling investments, changing investment portfolio allocation and taking other protective action. Consequently, the actual impact of a change in the assumptions may not have any impact on the liabilities, whereas assets are held at market value on the balance sheet. In these circumstances, the different measurement bases for liabilities and assets may lead to volatility in shareholder equity.

Other limitations in the above sensitivity analyses include the use of hypothetical market movements to demonstrate potential risk that only represent the Group's view of possible near-term market changes that cannot be predicted with any certainty, and the assumption that all interest rates move in an identical fashion.

#### **Price risk**

Price risk is the risk that the value of a financial instrument will fluctuate as a result of changes in market prices whether those changes are caused by factors specific to the individual security or its issuer or factors affecting all securities traded in the market. The Group is exposed to price risks of its products which are subject to general and specific market fluctuations.

The Group manages price risk through periodic estimation of potential losses that could arise from adverse changes in market conditions and establishing and maintaining appropriate stop-loss limits and margin and collateral requirements. With respect to undrawn loan commitments the Group is potentially exposed to a loss of an amount equal to the total amount of such commitments. However, the likely amount of a loss is less than that, since most commitments are contingent upon certain conditions set out in the loan agreements.
